Introduction and Background

This Neighborhood Portrait data profile was prepared by Data You Can Use with the support of Urban Economic Development Association of Wisconsin (UEDA). The framework is based on input and advice from community organizers working in the neighborhoods supported by Milwaukee's Community Development Block Grant (CDBG) program. The original set of neighborhood portraits were released by Data You Can Use in 2016 using 2010-2014 American Community Survey 5-year estimates. This document is part of the first update to those original Neighborhood Portraits and has been edited in response to community feedback following the release and use of the original portraits.

Data You Can Use and our partners hope that these tables continue to be used by those working in Milwaukee neighborhoods in their work planning, organizing, and funding development work and programming. It is designed to be used with their staff, their partners, their funders, their elected officials, and the residents of their neighborhoods, and can be used to supplement and support the stories and anecdotes of residents to build a case for needed resources, and to identify more questions.

As part of the release of the updated Neighborhood Portraits, related training on the use of census data was conducted and offered to the neighborhood partners. A final draft of each Portrait was reviewed by these same partners, and neighborhood organizers shared the ideas, stories, and strategies that they derived from the data.

With each update to the Neighborhood Portraits, Data You Can Use strives to provide both timely data and improvements to the way data is displayed and/or the topics covered. Longer-term plans include the possibility of an interactive way to access neighborhood data, looking at some of the data points over time, and adding additional topics to the Portraits. Data You Can Use actively maintains a "wish list" of hopeful future improvements for the Neighborhood Portraits; please reach out to us if you have any questions, comments, or recommendations for future expansion of this project to new topics or neighborhoods in Milwaukee at connectwithus@datayoucanuse.org.

About the Data and Acknowledgements

Data Sources

This data portrait uses data from the 2017-2021 American Community Survey (ACS) 5-year estimates, which was the most up-to-date data at the time of the writing of this report. Specific source tables from the ACS are cited below each table within this report.

Census tracts 1858, 1861 and 1862 were used to define the Midtown neighborhood for the purposes of this report. These tracts were chosen based on Neighborhood Strategic Planning Area (NSP) boundaries and in consultation with our neighborhood partners. The tables in the report describe the population that live within these census tracts. Please note that the boundaries of these tracts may differ from neighborhood or NSP boundaries.

Data Quality and Reliability

The data found in this report is from the American Community Survey and is some of the best data available that describes the people, households, families, and housing in Milwaukee neighborhoods. The American Community Survey data is collected by the U.S. Census Bureau, which holds its data to high standards.

It is also important to note that numbers and percentages included in this report are considered estimates. This is because the Census Bureau uses a sample of the population when they conduct the survey, which creates some level of uncertainty. The data presented here have a margin of error associated with each data point, which is a measure of the possible variation of the estimate and the true population value of each number. The margin of error helps data users understand the reliability of each data point.

We have chosen not to include margin of error for the estimates in the tables below so that the tables are clearer and easier to use. If you would like more information about data reliability for the tables in this report or would like to know the margin of error for a particular estimate, please reach out to our team at Data You Can Use. If you want to learn more about the American Community Survey, please refer to the [handbook for American Community Survey Data Users](#).

Data Source: 2017 - 2021 American Community Survey 5-Year Estimates, table B17001. Note: The total population number for this table does not match the total population number that can be seen in the previous tables. This is because this table is showing data for the total population for whom poverty status can be determined – in this case, slightly fewer people from the neighborhood.

How to interpret this table

The Census Bureau defines the poverty threshold differently for each person or family. Thresholds vary by the size of the family and the age of the members and are updated for inflation on an annual basis. [Read more about poverty thresholds here.](#)

Key Takeaways

- Almost half (45.7%) of Midtown neighborhood residents live in households with incomes below the poverty line, compared to 24.1% in the City of Milwaukee overall.

Data Source: 2017 - 2021 American Community Survey 5-Year Estimates, table B11001 *Note: the average household size for the neighborhood shown here is an estimate calculated by dividing the estimated total number of residents in the neighborhood by the estimated total number of households. This methodology is the same as the methodology used by the U.S. Census.

How to interpret this table

The Census Bureau defines a family as “a group of two people or more (one of whom is the householder) related by birth, marriage, or adoption and residing together; all such people (including related subfamily members) are considered as members of one family.”

Key Takeaways

- 38.3% of households in the Midtown neighborhood are occupied by individuals living alone, greater than the rate for the City of Milwaukee (37.8%).
- The estimated average household size for the Midtown neighborhood is 2.76 people per household, which is greater than the average household size for the City of Milwaukee as a whole (2.45).

Data Source: 2017 - 2021 American Community Survey 5-Year Estimates, table S2301

How to interpret this table

- The **labor force participation rate** refers to the proportion of the population age 20-64 that is either working or actively looking for work.
- The **employment/population ratio** is the proportion of the population age 20-64 that is working.
- **Unemployment rate** is the percentage of those in the labor force who are not working.
- In this table, **not working** refers to the combined percentage of people who are not in the labor force and those who are in the labor force but are unemployed.

Key Takeaways

- 58.3% of Midtown neighborhood residents ages 20-64 are participating in the labor force by working or actively looking for work, less than the rate for the City of Milwaukee (75.4%).
- 6.3% of the labor force from the Midtown neighborhood is unemployed and looking for work, similar to the City of Milwaukee (6.0%).
